

School Law's Evolution – Reflections of a Texas School Lawyer

By Kelly Frels, J.D.

Softcover, 188 pages

\$32.99

Published during the 50th anniversary year of the Supreme Court's seminal decision on student free speech in the *Tinker v. Des Moines* case, this volume — many years in the making — offers a true insider's perspective on the evolution of school law from one of the field's pioneers.

Texas attorney Kelly Frels reflects on his almost fifty years of practicing school law, including how it has been shaped by vast changes in education and society in general; how he was influenced by people from the early years of Education Law Association (he is ELA's current longest-term member) and Council of School Attorneys (COSA); and about the formation and development of Texas education and law organizations. His personal narrative makes these historical circumstances come alive and reminds us of the students, parents, teachers, professors, administrators, and attorneys who created, negated, mediated, and litigated the legal issues that impact us today.

Among the many subjects he covers are:

- Representing many Texas school districts and community colleges in cases involving desegregation, religion, prayer, employment law, construction, special education, student discipline, athletics, sexual harassment, gender issues, immigration, and much more
- Changes in the role of parents, school administration and governance, finance, effects of state and national legislation
- Tips for success in law, lawyering, and life
- What he has learned, and the people who have taught him

It's a one-of-a-kind retrospective anyone interested in school law shouldn't miss!

Kelly Frels, J.D. has been a school lawyer in Texas for his entire legal career and a leader of associations for attorneys in education law
